

Roi Revivo FS (Full-Stack) developer

0502855522 | roi14102000@gmail.com | [Linkdin](#) | [Git Hub](#)

Summary

Experienced Full-Stack Developer with a **front-end focus**. Proven ability to build web applications using technologies like **React.js**, **Node.js**, **Nest.js**, and various front-end frameworks/libraries. **Strong problem-solving** skills. **Adaptable learner** with a successful record of acquiring new skills.

Education

Cyber Pro Full Stack Boot Camp
Israel

Ramat Gan,

Learned the basics of web development, starting with HTML, CSS, and JavaScript, then progressed to React (front-end) and Node.js (back-end) projects.

Experience

Full-stack developer

March 2024 – Present

IDF & Lotem & BI data

Beer Sheva

- Gain practical experience in web development in react.js, Nest.js and accept tasks at Jira.
- jump into a live project fixing bugs, create new futures, and collaborate with a team throws GitLab.
- Without knowing nest.js at the start. I successfully adapted, including backend-oriented solutions.
- Gain satisfaction by creating new features that Impact IDF command and control when we are in a war.

Security guard

April 2022 – March 2024

Intel

Qiryat Gat

Combat solidier

Aug 2019 – April 2022

IDF Nahal

Gaza, Lebanon, Hevron

- Operated under high-pressure battlefield conditions, demonstrating resilience and commitment.
- Coordinated with fellow soldiers to achieve mission success, honing troubleshooting, and team collaboration skills.
- Maintained determination and perseverance, never backing down regardless of the difficulty or danger of the mission.

Projects

[Trip Planner](#) is a full-stack web application that helps users find flights, hotels, and attractions at their travel destination.

- Technologies: **node.js**, **express**, **JWT**, and **SQL with sequelize ORM**, **react.js**, **Axios**.
- Developed a full-stack web application using node.js serving a REST API with React as the frontend.
- Implemented JWT to manage the session and security.
- use external API that provides data by coordinates query about the destination Hotels or attraction.
- design SQL relation DB that has FK logic to call the data effectively

[CV Creator](#): Developed a web application for creating CVs with live updates based on user input.

- Technologies: **Node.js**, **Express**, **JWT**, **MongoDB**, **React**, **React-Router-Dom**, **React-Hook-Forms**, **PDF-Render**, **Tailwind CSS**.
- Faced the challenge of rendering PDF with on change update smoothly and handling complex forms at the same screen.
- Overcame the challenge by leveraging React Hook Forms and implementing debounce value to improve performance.

Contribution To Open Source

Maakaf Open-Source, Israeli open-source community.

- Actively developed new features for a working website.
- Communicated with clients (head of Maakaf) to understand and implement their needs.
- Collaborated with different teams and gathered my own team and worked with GitHub.
- Dive into a next.js project without knowing the framework. I successfully adapted and acquired the skill.

Technical Skills

Languages: Python, JS (JavaScript), HTML / CSS

Frameworks: Next.js, Node.js, Django, React Native

Developer Tools: Git, GitLab, VS Code, Visual Studio, MongoDB, SQL

Libraries: Selenium, SQL ORM (Sequelize), React.js, Redux.js

JWT, react-hook-forms, react-router-Dom, skeleton, PDF-render, Axios, tailwind CSS, SCSS
